

## CRL Statistics

CRL began using the Image Permanence Institute's e-Climate sensors and e-Climate Notebook system in November 2015. The statistics presented here are the average temperatures for the stack areas of the building based on sensors placed throughout three floors of the facility.

| Date Range          | Temperature | Relative Humidity | Dew Point |
|---------------------|-------------|-------------------|-----------|
| 11/9/2015-1/28/2016 | 58.5        | 45%               | 37        |
