Established in 1934 the Wirtschaftsgruppe Privates Bankgewerbe was both a lobby for the private sector and an official instrument of National Socialist economic and social policy. It played a major part within the National Socialist system of oppression as well as in organizing and carrying out the persecution of Jews. Ranging from the administrative expropriation of bank accounts to the technical liquidation of the property formerly owned by deported Jews the Wirtschaftsgruppe not only contributed decisively to the deprivation of rights of German and European Jews but also provided the states illegal activities with an aura of legality. Several times a week until April 1945 the Wirtschaftsgruppe headquarters ... sent out reports some of them declared strictly confidential to the branches of private banks. Printed only in small quantities and therefore very rare today these circulars are now available in full as a microfiche edition. This set of microfiche might be somewhat specialized for many research libraries but having it available for lending in North America would certainly be a boon to researcher in the fields of German History and Holocaust Studies. It serves as an aid to learning the history of particular victims of the Holocaust and is searchable by name. The actions of individual banks can also be examined. Larger projects involving the economics of the Reich can be supported using this collection of documents.
