Florida Academic Repository (FLARE) Print Archiving Network Update

The **FL**orida **Academic RE**pository (FLARE) is the statewide shared collection of low use print materials from academic libraries in Florida. By establishing this centrally housed collection, the Council of State University Libraries (CSUL) provides new options for sharing the costs and effort of long term retention of low use library materials. Under the FLARE memorandum of understanding, the materials designated under this agreement will be retained and made available as long as the need for them exists, thereby allowing participants to consider withdrawing duplicates of these items from their campus collections and to rely with confidence on access to the centrally retained copies. Eventually FLARE will be housed in an environmentally controlled, carefully inventoried and secure high density facility (HDF) located in Gainesville, operated by the George A. Smathers Libraries at the University of Florida (UF) on behalf of the participating libraries. Until construction is complete, FLARE will be housed in a leased Interim Library Facility (ILF) and in the UF Libraries Auxiliary Library Facility (ALF), both of which support appropriate environmental and security conditions. In addition to the libraries in the 12 State Universities and the University of Miami, partners in FLARE will include libraries of the Independent Colleges and Universities of Florida and the Florida College System.
