

The University of California Shared Print program facilitates the effective development and management of physical collections among the libraries of the University of California. Through coordinated action, the UC Libraries optimize the management of information resources for students and faculty. With a longstanding tradition of collaboration among the libraries and with extramural partners, the UC shared print collections include monographs, journals, microforms, and art slides that are jointly collected and collectively managed; most are held as shared collections in storage while others are held in place, in full-service campus libraries. Program website: <http://www.cdlib.org/services/collections/sharedprint/>

Shared print collections, strategies, and extramural partnership are developed and managed by Shared Print Strategy and Operation Teams. For more information, contact Alison Wohlers, UC Libraries Shared Print Manager: alison.wohler@ucop.edu.

Partnership for Shared Book Collections

After participating extensively in the formative period of the newly launched Partnership for Shared Book Collections, the decision was made via the [UC Libraries Advisory Structure](#) to formally become a member program in the organization. UC continues to contribute via various working groups, including the Best Practices Working Group. Please see the [press release](#) to read more about UC's decision to join the Partnership.

UC Launches its Fifth Annual Journal Archiving Campaigns to the RLFs (JACS)

JACS are a coordinated effort to rapidly deposit all holdings for a defined title list (totaling approximately 500 journal titles and up to 30,000 volumes per year) into the UC Regional Library Facilities, where a single copy is consolidated for long-term retention and access. The campaigns are voluntary. Seven to eight UC campuses participate each year. Titles are *in addition* to other WEST title lists.

Participating campuses ship all holdings to the facilities without reviewing volumes or issues. RLF staff validate holdings at the volume level and deaccession duplicates.

This approach has proven very popular among participating campuses as it alleviates staff time (by about 30%) at contributing libraries in making volume-level decisions. All holdings are shipped to the RLFs where staff members remove duplicates, fill gaps, and validate holdings. Gaps are filled very rapidly, and campus shelf space is readily reclaimed.

UC Libraries are currently in their fifth Journal Archiving Campaign (JACS 5)! The JACS 5 list aims to offer significant and wide-spread opportunities for deduplication of UC campus collections with the goal of reclaiming space to be used for other library and campus priorities. Also a priority of JACS 5 was identifying titles in areas where the JACS program could help fill gaps in the wider collective shared print collection to support both local UC campus needs as well as preserve the print scholarly record. The full collections analysis report is available [here](#).

UC Libraries Participation in WEST and HathiTrust

UC Libraries continue to be high contributors to the development of the WEST regional journal shared print collection. The UC Regional Library Facilities serve as centralized retention locations for higher risk journal titles (titles with fewer electronic access points). UC campus libraries maintain in-place collections of WEST lower risk titles, as well.

Five (5) University of California libraries and the two UC Regional Library Facilities participated in the Phase 1 HathiTrust shared print program. In the first phase, UC Libraries identified 1.7 M monographs for retention in the HathiTrust program. Most are held at the Regional Library Facilities, while approximately 30,000 monographs were identified for in-place retention at each of three participating campuses. UC Merced participated in Phase 2 retaining approximately another 700-800 items.
